**Courses Supported
with Kubi on Zoom**

Pedagogies

Top-left: Traditional Telepresence. Big screens on the front & back walls. Works only for whole group

Top-Right: Add a Kubi and you can do small group activities, 1 kubi per remote student.

Bottom-left: You can have more than one remote student in a group and they can talk Kubi-to-Kubi but we have learned that remote students prefer to share one Kubi so they can hear each other better

Bottom-right: In rooms without telepresence equipment, the Kubi can be used in both whole group and small group

Supporting Student Success & Retention

Job / Spouse Moves

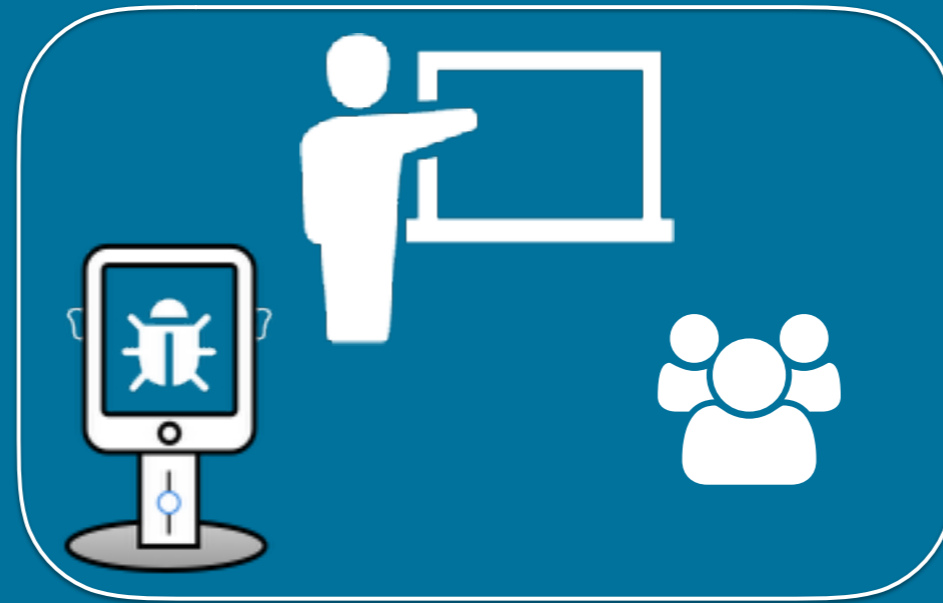

Financial Burden

In cases where the student is transferred (or their spouse), we have had them continue the class over Kubi on Zoom.

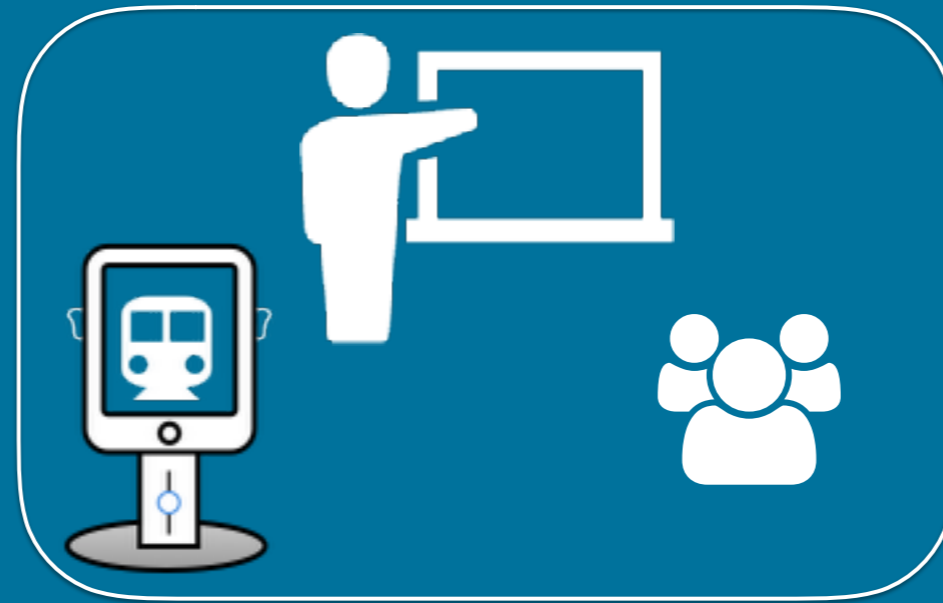

We have also had students who flat ran out of money to be a resident student and were able to complete the courses they were in after moving back home with Mom & Dad by connecting via Kubi over Zoom.

Reducing Absenteeism

Students who are sick or who have sick children are requesting Kubis so that they don't miss class.

Reducing Absenteeism

Whether traveling to a conference or on a team bus, student can use their phones & tablets with data plans to connect to a Zoom meeting. Tablets can also control a Kubi.

Tips for Success

FACULTY

- High tolerance for glitches
- Manages transitions
- Uses wait time effectively

INSTRUCTIONAL SUPPORT STAFF

- Student focused
- Zoom account admins
- Focused on the details
